# Annual Index

VOLUME III

January.....1–108
April.....109–187
July.....203–000
October.....000–000

Adjustment Process in a System: A Behavioral Model of Human Movement, Stephen M. Golant, 203–220

Aggregate Model of City and System Development, An, P. Corbin, 128–39

Alao, Nurudeen, Two Classes of Distance Minimization Problems: A Review, Some Interpretations, and Extensions, 299–319

Barton, B., and W. Tobler, A Spectral Analysis of Innovation Diffusion, 182–86, 195–99

Black, William R., An Iterative Model for Generating Transportation Networks, 283–88

Board, Christopher, Richard Chorley, Peter Haggett, and David Stoddart, editors, *Progress in Geography*, reviewed by John Hudson, 407–409

Book Reviews, 101–106, 294–97, 407–409

Books Received, 410–13

Brown, Kenneth M., Regional Differences in Efficiency: Implications for a Model of Regional Income and Growth, 354–60

Casetti, E., L. King, and D. Jeffrey, Structural Imbalance in the U.S. Urban Economic System, 1960–1965, 239–55.

Cerny, James W., Display of Trend Surfaces, 268–72

Changing Pattern of District Administrative Centres in Uganda since 1900, The, Michael A. Hirst, 90–98

Chatterji, M., The Structure and Growth of Indian Cities, 288–94

Chorley, R. J., *see* Board, Christopher; *see also* Haggett, P.

Cliff, Andrew D., and Keith Ord, Evaluating the Percentage Points of a Spatial Autocorrelation Coefficient, 51–62

Comparisons of Urban Structure in Canada, the United States, and Great Britain, Gerald Hodge, 83–90

Corbin, P., An Aggregate Model of City and System Development, 128–39

Dacey, Michael F., Two-Dimensional Urban Contact Fields, 109–120; A Picture Language for Periodic Strip Patterns, 320–34

Davis, George, *see* Scheaffer, John R.

Davis, J. Tait, Sources of Variation in Housing Values in Washington, D.C., 63–76

Discussion Papers, 413–15

Display of Trend Surfaces, James W. Cerny, 268–72

Distance Transformation and Distance

XUM

Decay Functions, Peter J. Taylor, 221–38

Effect of Stream Size and Land Slope on the Recurrence of Floods in New England, S.T. Wong, 77–83
Empirical Verifiability of Classical Central Place Theory, M. J. Weber, 15–28
Evaluating the Percentage Points of a Spatial Autocorrelation Coefficient, Andrew D. Cliff and Keith Ord, 51–62
Expected Proportion of a Region Polluted by *k* Sources, Arthur Getis and P. H. Jackson, 256–61

Gale, Stephan, A Simple Device for the Recognition of Geographic Patterns, 187–94, 200–201
Generalization of the Population Density Gradient Concept, A, G. J. Papageorgiou, 121–27
Geometric Structure of an Optimal Transport Network in a Limited City–Hinterland Case, The, Lalita Sen, 1–14
Getis, Arthur, and P. H. Jackson, The Expected Proportion of a Region Polluted by *k* Sources, 256–61
Golant, Stephen M., Adjustment Process in a System: A Behavioral Model of Human Movement, 203–220
Grima, A. P., review of *Metropolitan Water Resource Management as an Emerging Specialized Area*, 284–86

Haggett, P., and R. J. Chorley, *Network Analysis in Geography*, reviewed by M. J. Scarlett, 101–103; *see also* Board, Christopher
Hay, Alan M., Notes on the Economic Basis for Periodic Marketing in Developing Countries, 393–401
Hirst, Michael A., The Changing Pattern of District Administrative Centres in Uganda since 1900, 90–98
Hodge, Gerald, Comparisons of Urban Structure in Canada, the United States, and Great Britain, 83–90
Howard, Alan D., Simulation of Stream Networks by Headward Growth and Branching, 29–50
Hudson, John C., Structure of Point Processes, 262–67; review of *Progress in Geography*, 407–409

*Introduction to Mathematical Ecology, An*, by E. C. Pielou, reviewed by George J. Papageorgiou, 105–106
Iterative Model for Generating Transportation Networks, An, William R. Black, 283–88

Jackson, P. H., *see* Getis, Arthur
Jeffrey, D., *see* Casetti, E.
Jones, Anthony, An Order Neighbor Approach to Random Disturbances on Regular Point Lattices, 316–78
Juncker, Paul, A Spatial Model for System Boundary Analysis, 272–82

King, L., *see* Casetti, E.

Large-City Interdependence and Preelectronic Diffusion of Innovations in the U.S., Allan R. Pred, 165–81
Location of Cotten Production in the United States under Competitive Conditions, The: A Study of Crop Location and Comparative Advantage, Paul I. Mandell and Luther G. Tweeten, 334–53

McCalden, Gerald, review of *Studies in Regional Science*, 294–95
Mandell, Paul I., and Luther G. Tweeten, The Location of Cotten Production in the United States under Competitive Conditions, 334–53
Massam, Bryan H., A Test of a Model of Administrative Areas, 402–406
*Metropolitan Water Resource Management as an Emerging Specialized Area: A State-of-the-Art and Literature Review*, by John R. Scheaffer, Shirley A. Starr, George Davis, and Alan Richmond, reviewed by A. P. Grima, 284–86
Murdie, Robert A., review of *Urban Analysis: A Study of City Structure with Special Reference to Sunderland*, by B. T. Robson, 103–105

*Network Analysis in Geography*, by P. Haggett and R. J. Chorley, reviewed by M. J. Scarlett, 101–103
Notes on the Economic Basis for Periodic Marketing in Developing Countries, Alan M. Hay, 393–401
Numerical Surface Climate Stimulator, A, S. I. Outcalt, 379–93

On the Interpretation of Suppression Variables in a Multiple Linear Regression Analysis, by Richard A. Stephenson, 99–100
Ord, Keith, *see* Cliff, Andrew D.
Order Neighbor Approach to Random Disturbances on Regular Point Lattices, Anthony Jones, 361–78
Outcalt, S. I., A Numerical Surface Climate Simulator, 379–93

Papageorgiou, George J., review of *An Introduction to Mathematical Ecology*, by E. C. Pielou, 105–106; A Generalization of the Population Density Gradient Concept, 121–27
Picture Language for Periodic Strip Patterns, A, Michael F. Dacey, 320–33
Pielou, E. C., *An Introduction to Mathematical Ecology*, reviewed by George J. Papageorgiou, 105–106
Postulates of Central-Place Theory and Properties of Central-Place Systems, by Gerard Rushton, 140–56.
Pred, Allan R., Large-City Interdependence and Preelectronic Diffusion of Innovations in the U.S., 165–81.
*Progress in Geography*, edited by Christopher Board, Richard Chorley, Peter Haggett, and David Stoddart, reviewed by John Hudson, 407–409

Regional Differences in Efficiency: Implications for a Model of Regional Income and Growth, Kenneth M. Brown, 354–60
Richmond, Alan, *see* Scheaffer, John R.
Robson, B. T., *Urban Analysis: A Study of City Structure with Special Reference to Sunderland*, reviewed by Robert A. Murdie, 103–105
Rushton, Gerard, Postulates of Central-Place Theory and Properties of Central-Place Systems, 140–56
Scarlett, M. J., review of *Network Analysis in Geography*, by P. Haggett and R. J. Chorley, 101–103
Scheaffer, John R., Shirley A. Starr, George Davis, and Alan Richmond, *Metropolitan Water Resource Management as an Emerging Specialized Area*, reviewed by A. P. Grima, 295–97
Scott, Allen J., editor, *Studies in Regional Science*, reviewed by Gerald McCalden, 294–95
Sen, Lalita, The Geometric Structure of an Optimal Transport Network in a Limited City–Hinterland Case, 1–14
Simple Device for the Recognition of Geographic Patterns, A, Stephan Gale, 187–94, 200–201
Simulation of Stream Networks by Headward Growth and Branching, Alan D. Howard, 29–50
Sources of Variation in Housing Values in Washington, D.C., J. Tait Davis, 63–76
Spatial Model for System Boundary Analysis, A, Paul Juncker, 272–82
Spectral Analysis of Innovation Diffusion, A, B. Barton and W. Tobler, 182–86 195–99
Starr, Shirley A., *see* Scheaffer, John R.
Statement of Ownership, Management, and Circulation, 107
Stephenson, Richard A., On the Interpretation of Suppression Variables in a Multiple Linear Regression Analysis, 99–100
Stoddart, David, *see* Board, Christopher
Structural Imbalance in the U.S. Urban-Economic System, 1960–1965, E. Casetti L. King, and D. Jeffrey, 239–55
Structure and Growth of Indian Cities, The, M. Chatterji, 288–93
Structure of Point Processes, John C. Hudson, 262–67
*Studies in Regional Science*, edited by Allen J. Scott, reviewed by Gerald McCalden, 294–95

Taylor, Peter J., Distance Transformation and Distance Decay Functions, 221–38

Test of a Model of Administrative Areas, A, Bryan H. Massam, 402–406
Time Paths of Migrant Flows: Belgium, 1954–62, Lakshman Yapa and Julian Wolpert, 157–64
Tobler, W., *see* Barton, B.
Tweeten, Luther G., *see* Mandell, Paul I.
Two Classes of Distance Minimization Problems: A Review, Some Interpretations, and Extensions, Nurudeen Alao, 299–319
Two-Dimensional Urban Contact Fields, Michael F. Dacey, 109–120

*Urban Analysis: A Study of City Structure with Special Reference to Sunderland*, by B. T. Robson, reviewed by Robert A. Murdie, 103–105

Weber, M. J., Empirical Verifiability of Classical Central Place Theory, 15–28
Wolpert, Julian, *see* Yapa, Lakshman
Wong, S. T., Effect of Stream Size and Land Slope on the Recurrence of Floods in New England, 77–83

Yapa, Lakshman, and Julian Wolpert, Time Paths of Migration Flows: Belgium, 1954–62, 157–64
